CSS:
Use to add your css.

Customizable CSS Classes

CSS Classes for advanced customization

If you have some knowledge of how to set up style sheets, here are the main classes that you can format to create your own design.

If you do not have this knowledge, you can request support in our forum. Also, we recommend that regular visits to our official site – VTEM.NET - where you can find some examples in the future.

Here's the list of classes and ID CSS style used on the VTEM Slideshow module:

. vtem_wapper
. slidemain
. ft-title
. ft-prev
. ft-next
. vtem_button
. ft-button-slideshow1-active

In some cases, may have to impose the setting of class, to overcome already existing ones on the module, by placing the "!important" class in the style configuration.
